

Set an alarm for 4pm.

Thought: To set an alarm for 4pm, I need to find and open the alarm or clock app. Since the alarm app icon is not immediately visible on the current screen, I may need to swipe up or tap on the app drawer icon (if present) to view more apps and locate the alarm or clock app.

Action: swipe(1, "up", "medium")

Thought: To set an alarm for 4pm, I need to open the Clock app. The next step is to tap on the Clock app icon.

Action: tap(25)

Thought: To set an alarm for 4pm, I need to navigate to the alarm section of the Clock app if not already there, and then use the button to add a new alarm.

Action: tap(1)

Thought: To set a new alarm for 4 PM, I should tap the button to add a new alarm.

Action: tap(14)

Thought: To complete the given task, I need to set the alarm for 4:00 PM. The hour is close to the desired time, so I should first switch from AM to PM using the PM button.

Action: tap(4)

Thought: To complete the given task, I should set the minutes to "00" to make the alarm for 4:00 PM.

Action: tap(1)
