

Trial and Error

Please help me change Chrome's language settings to Japanese.

Thought: I have found the Japanese language option and checked it. Now I need to click the "Add" button to confirm adding Japanese as a Chrome language.

Chrome is still in English

Thought: It seems Chrome is still in English and my changes haven't taken effect. However, I notice that "Japanese" has appeared in Chrome's language options, which might mean I need to take additional steps. I will click the three-dot icon on the right and follow the prompt to determine what to do next.

Reflection

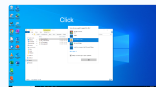

Convert the first documents into PDF format in the same dir.

Thought: I need to open the first document, and now I need to select how to open the file. Since it's in HTML format, I want to open it using

The incorrect grounding caused a click on the LibreOffice Draw icon.

Thought: I mistakenly clicked on the LibreOffice Draw icon in the previous step, I need to adjust the clicking position upward to ensure I click on the correct location.

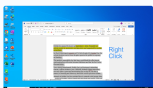

Task Decomposition

Set the line spacing to double spacing and remove all background colors from the document.

Thought: I have selected all the text, and now I need to set the line spacing to double.

To do this, I need to right-click and select "Paragraph". In the dialog box that appears, find the "Line spacing" option and select "Double" from the dropdown menu.

Long Term Consistency

Add the homepages of Google, YouTube, Facebook, Apple, Wikipedia, Netflix, and Instagram to your bookmarks bar.

Thought: I see the bookmark popup window, I need to click the "Done" button.

Thought: I've already added Google, YouTube, Facebook, and Apple. I see a photo of someone waving on the screen, but this is irrelevant to my task. Now I need to continue adding Wikipedia's homepage...

MileStone Recognition

Set the desktop wallpaper to the second image from system's automatic wallpapers, and adjust the resolution to "16:9".

Thought: I have opened the background settings interface, and now I need to select the second system wallpaper.

Thought: I have switched to the second automatic image as the wallpaper, and from the background, I can see that the wallpaper has been changed to the second image. Therefore, next I need to continue adjusting the screen resolution to 16:9.
