

Who develops both Resnet and MAE?

We need to first find ResNet and MAE in the graph. ①

*RetrieveNode(Resnet), RetrieveNode(MAE)*

The node IDs for Resnet and MAE are p-152 and p-562.

Next, check the author neighbors of the two papers. ②

*Neighborcheck(p-152,author), Neighborcheck(p-562,author)*

The authors neighbors are [a-54, a-75, ...] and [a-75, a-23, ...].

The intersection author is a-75. Let's check his/her name. ③

*NodeFeature(a-75,name)*

The name for a-75 is Kaiming He.

We have obtained the answer: Kaiming He.

*Finish[Kaiming He]* ✓
