

Prompt B.1: Dynamic Skill Discovery from Failures

Analyze these failed `{env_description}` agent trajectories and suggest NEW skills to add.

FAILED TRAJECTORIES: `{failure_examples}`

EXISTING SKILL TITLES: `{existing_titles}`

Generate 1-3 NEW actionable skills that would help avoid these failures. Each skill must have: `skill_id`, `title` (3-5 words), `principle` (1-2 sentences), `when_to_apply`. The `skill_id` should be unique and follow the pattern: "dyn_001", "dyn_002", etc.

Return ONLY a JSON array of skills, no other text.
