

Illustration of Prompts Utilized by LLM-as-Predictor Methods on the Cora Dataset

LLM Instruction Tuning: Given a node-centered graph with centric node description: **<raw_text>**, each node represents a paper, we need to classify the center node into 7 classes: **<labels>**, please tell me which class the center node belongs to?

GraphGPT: Given a citation graph: **<graph>**, where the 0-th node is the target paper, with the following information: **<raw_text>**. Question: Which of the following specific research does this paper belong to: **<labels>**. Directly give the full name of the most likely category of this paper.

LLaGA: Given a node-centered graph: **<graph>**, each node represents a paper, we need to classify the center node into 7 classes: **<labels>**, please tell me which class the center node belongs to?
